

TRANSCENDENT CONSPIRACY DATA SHEETS

Gear Descriptions Entities

- Normal Person

Has none.

- Employee

56 --* Depends of the context of Gear and Char.

- Person With Power

96 --* Depends of the context of Gear and Char.

- Ontological Sources

Has none.

- Space Radio

40 Co Transmission - The main function of a radio communicator. Can catch frequencies in a virtually infinite range, being able to cross dimensions if tuned to the right settings.

- Marcela Kapu

560 Ak Anomalous Knowledge - The dedication to her studies about anomalies allowed her to deduce a kind of method to study them, comprehend the, and, for some, even reverse engineer them.

560 Ak Extradimensional Dislocation - Has the capacity to move through incomprehensible dimensions and ways, being able to teleport, create portals and even break the 4th wall due to the anomalous nature of her new conscience.

560 Ak Biomanipulation - Her passion for Molecular Biology, along with her anomalous conscience have given Kapu the capacity to modify organic composites in her or her allies' favor, by manipulating any type of available organic matter, reconstituting it, altering it or mixing it into mechanic systems.

560 Dx Surgical Accuracy - Her studies on the biological field allowed for Kapu to peek at some aspects of the medicine and tech angles, applying them whenever needed.

560 Sv Self Defense - After acquiring the new state of conscience, Kapu realized she was quite lacking in non-anomalous methods for defending herself, so she spent some time learning Martial Arts, gaining a taste for Krav Maga and Tae Kwon Do.

560 K Academic Knowledge - Before becoming an anomaly, Kapu was a relative highlight of the CUC's student body, with that intelligence being reflected in the different applications of her studies both in a general and specific sense.

560 I Logical Persuasion - She doesn't have that "knack" for interactions or tasks that could require someone's "charisma", therefore her more objective way of thinking allows her to use tools such as abstraction and analogies to portray logic and facts in a favorable manner. Outside of that, though, there's hardly more that she could do than use your common Occam's Razor, for example.

560 Dr Mental Alert - An ability developed as a vantage point of using multiple perspectives through multiple consciences, which is able to send a "ping" inside of the minds she inhabits or any allies who accept that system.

- Guidance_Bob.exe

2980 If Information - Such as Kapu, Bob managed to replicate his source code into unimaginable places, creating a multiversal database of immense depth where when put together with the logs of his former connection to the scientist, and all the resources of the current device, it can create all types of made-to-measure analysis when required.

2980 If Orientation - Can use his algorithms along with the info provided by his surrounding to map 3d, 2d or higher dimensions or even calculate ETAs for processes.

2980 If Logic Problem Solving - His solution algorithms can be used to decode, encrypt, search for the most optimal ways to solve problems and (on this experimental iteration) try to solve some more philosophic types of problems for a little bit of brain teasing!

2980 If Relax - Whenever you want to put your legs up and play something, he always got the right selection! Between Simple Games, 8-Bit, 16-Bit or even a mini RPG campaign, Bob can always lend a hand!

- Marumargpagrinforslebjitza

1616 Dm Oniric Zipper - The creature's main function and part of its body, it can be opened by it and serves as the main gateway to his internal dream pocket dimension. Possess the following abilities: Absorb Items or Beings, Expel them, Transmit Morphean Waves to enforce sleepiness into an individual target and create derivated Oniric Illusions from that waves.

232 A Dodging Techniques - Used to get out of direct attacks by the methods of the following abilities: Flee and Parry.

464 St Wild Combat Techniques - Used by its animalistic body, it has the following abilities: Slash with its Claws, One-Hoof Kick, Two-Hoofs Flying Kick or Horsekick and Headbutt.

232 K Pediatric Psychology - Part of its nature as a children's toy, it serves to help with the filtering of dreams. It has the following abilities: Positive Stimulus, rewarding the target for doing something and Negative Stimulus, rewarding it for not doing something.

232 I Calming Techniques - Part of its functionality as a Sogno Borse, same as guiding the targets through their sleep, the creature can also induce sleepiness by using abilities such as: Lullaby and Reassurance.

- Mount Fellowfaller

348 St Physical Strikes - Combat Skills acquired through experience, being able to normally attack with his hands and feet, using the staff as a weapon or making use of the environment to disorient possible enemies.

116 A Body Flexibility - Tuid'emu bestowed Go'vlud, beyond spiritual blessings, superhuman capacities of movement, allowing him to realize incredible acrobacies.

116 DX Ritualistic Accuracy - Years of ritual practice allowed Go'vlud to more accurately observe the movements and techniques to do ranged attacks, be them physical object throws or launching magic orbs.

232 Sv Bare Physical Body - Go'vlud insists his current attire is only used for religious and decorative ends, while he has been training his defense through his own body to parry strikes and evade or simply resist them if they land.

464 K Kerio'a Knowledge - Besides governing, Go'vlud studies and teaches his people's culture, meaning to keep it alive through their history, recipes, manners for organizing themselves and, when needed, comprehension of the current state of his big family.

348 I Spirituality - Constant communion with Tuid'emu has given Go'vlud an affinity for internalizing and even transmitting the spiritual serenity so searched by many tormented souls, and with this he helps his people with questions that require advice, throw a prediction or two for those who want or even raise morale with fun metaphors.

464 Dr Mountain's Sentiment* - While close to Mount Fellowfaller, Go'vlud has a special connection with it, being able to alter its form (property which gave it the infamous "Living Mountain" reputation), alert other Kerio'as, analyze his surrounds and even hide specific elements through unknown manners.

464 Sr Tuid'emu's Energy - As every good divine spirit, its energy can also be used in combat to subdue possible threats, through summoning of lesser spirits, explosions of considerable size, using it as healing energy and even creating shields (equivalent time to 1 turn).

- Director/Janitor

6 Pr The Director's Side: Has the Director's personality and creates messages using Morse Code through means unknown.

6 Pr The Janitor's Side: Has the Janitor's personality and creates messages using Morse Code through means unknown.

- The Wanderer's Telescope

2000 AS Astroanomaly - The unknown force that connects the Telescope to the object, giving both extraordinary capacities, such as the Telescope's Zoom and the object's anomalous movement.

- Babelian Ghoti

6 CS The ability to distort and scramble all kinds of communication means or media of any type in a radius of approximately 656ft.

- Black Dragon Figurine

-- Sp Anomalous Blessing (Space) - When acquired by an individual, its anomalous characteristic is bestowed, giving them the abilities to teleport (restricted to the material plane) and protection against any events or processes that break the laws of physics (like surviving temperatures below the absolute zero, or spaghettification when reaching the center of a black hole or the changes in mass when reaching speeds over the speed of light).

- White Dragon Figurine

-- L Anomalous Blessing (Energy) - When acquired by an individual, its anomalous property is bestowed, giving one the abilities of light manipulation and immunity to vision disturbance (being able to see in absolute darkness or not being affected by flashes). When focusing while holding the item, it can also start shining to serve as a lantern.

- Raccoon Figurine

-- V Anomalous Blessing (Vectorial) - When acquired by an individual, its anomalous property is bestowed, giving one the abilities of floating, as if there was no gravity to bind the body, a parallax-like movement manipulation and immunity to vectorial effects, such as impacts or weight force, allowing for one to lift huge objects with little to no problems.

- Fox Figurine

-- In Anomalous Blessing (Infinite) - When acquired by an individual, its anomalous property is bestowed, giving one the abilities of time stop, invisibility, immunity to illusions and anomalous effects and the possibility for resurrection.

- Metaonthos' Figurine

-- M Anomalous Blessing (Meta) - When acquired by an individual, its anomalous property is bestowed, giving one the possibility to make a wish, any wish.

Hostiles

- Twin Antennae

Dif St Brutal Strikes - Like a wild animal, uses force to subdue its prey or kill it, either smashing it with its body, spraying external digestion acid or biting it.

Dif A Collective Motor Coordination - With the aid of the dormant body, the awakened body can use their weight to move quickly in environments like water, also evading enemy attacks.

Dif Dx Immobilize - With its tentacles, the creature can constrict the prey into submission, or can jump on top of it and bite its body, latching onto it and blocking its movement for a while (equivalent time to 2 turns).

Dif Sv Compact Form - By shrinking its External Node and its Monocular Appendix's connections, the creature can better absorb enemy impact or thrust itself to escape or evade enemy attacks.

Dif Dr Monocular Appendix - The eye on the tip of its body has anomalous properties of their own, where outside of having superhuman vision, being able to analyze on a radius of up to 3280ft, it can also paralyze prey to hunt more easily.

- Severed Antenna (Short)

Dif St Brutal Strikes - Like a wild animal, uses force to subdue its prey or kill it, but with less chances of survival.

Dif A Collective Motor Coordination - Without another body to aid it, it can only evade enemy attacks, not more than that.

Dif Dx Immobilize - It can only jump on top of it and bite its body, latching onto it and blocking its movement for a while (equivalent time to 2 turns).

- Severed Antenna (Long)

Dif St Brutal Strikes - Like a wild animal, uses force to subdue its prey or kill it, but with less chances of survival.

Dif A Collective Motor Coordination - Without another body to aid it, it can only evade enemy attacks, not more than that.

Dif Dx Immobilize - It can only jump on top of it and bite its body, latching onto it and blocking its movement for a while (equivalent time to 2 turns).

Dif Dr Monocular Appendix - The eye on the tip of its body has anomalous properties of their own, having superhuman vision, but without the help from the second body, its no better than a supertelescope.

- Hand Creatures

Dif St Brutal Strikes - With all the skill of many human hands, they can punch, slap, pierce the enemies with their fingers and claw them out even more strongly.

Dif A Extraflexible Joints - With articulations that are way more flexible than your average human hands, the creatures can use them to evade enemy attacks or contort for similar purposes.

Dif Dx Manual Coordination - Through well known techniques, like throwing the dust equivalent to the local soil (Dirt, Sand, House Dust) or an accurate flicker into their enemies.

Dif H Demoralize - Beyond the techniques, the creatures adapted some human customs, being able to demoralize enemies using obscene gestures or stunning them with a barrage of finger snapping up to 15 decibels above the recommended to keep auricular health.

Dif I Sign Language (ASL) - With this language adapted to their context of life, they currently find themselves in a primitive state of communication, though rapidly evolving.

- Hand Colony

Dif St Brutal Strikes - With all the skill of many human hands, they can punch, slap, pierce the enemies with their fingers and claw them out even more strongly.

Dif A Extraflexible Joints - With articulations that are way more flexible than your average human hands, the creatures can use them to evade enemy attacks or contort for similar purposes or even do complex acrobatics to gain strategic advantages.

Dif DX Manual Coordination - Through well known techniques, like throwing the dust equivalent to the local soil (Dirt, Sand, House Dust), an accurate flicker into their enemies or even throwing heavy objects at them, causing considerable damage, opening opportunities to flip the tables.

Dif Sv Strategic Relocation - The colony can take advantage of their multiplicity to rearrange themselves, surviving through planned division or through a complete union in a completely massive and spherical form.

Dif K Tool Crafting - Can use primitive techniques to create tools with the most varied functionalities, be them culinary, productive or primitive weapons such as spears, bows and arrows, tomahawks etc.

Dif I Sign Language (ASL) - With this language adapted to their context of life, they currently find themselves in a primitive state of communication, though rapidly evolving.

Dif Dr Quick Reaction Time - Multiple minds complement their senses of danger, making them able to improve their reaction time considerably, and some reactions that can take the colony out of danger include: Alert everyone, stay perfectly still when hidden to attack or compress themselves into a defensive form, opening their hands as shields when stopping enemy attacks.

Dif H Demoralize - Beyond the techniques, the creatures adapted some human customs, being able to demoralize enemies using obscene gestures or stunning them with a barrage of finger snapping up to 15 decibels above the recommended to keep auricular health.

- Lamnert Graveyard Statues

Dif A Anomalous Movement - With these skills, the statues can move while they are out of any nearby individuals' line of sight.

- Radiant Resting, Room 409

Dif St Golpes com Plantas - Uses vines and plants to strike enemies normally, varying from direct hits, low swipes, piercing the target or even grabbing an object to hit with or throw it.

Dif DX Restrict - In case the strategy change into immobilizing the target, it can use the plants around the room to capture some parts of the target's body, or completely encase it in a plant cocoon, or, in rare occasions, can move said "rooms" to confuse or separate them.

Dif Sv Parasitic Spores (Ø) - Uses some of the plants to release a spore cloud which can cause diverse effects in the targets, from poisoning them on 1% Dif CS Damage per turn, causing hallucinations, which reduce the Target's Property values in 13 if organic and compatible, and also being a common form of reproduction. On this sheet, the Gear is blocked while the targets are in the area equivalent to the hotel's surroundings.

Dif Ab Absorption - When leaving a target vulnerable (Destroying all of its Gear, Severing the Property/Essence Link...) can use this Gear to eat it and end the fight.

Dif Dr Lurk - As it is practically the whole battle area, it can take advantage of that entering a lurking mode by using this Gear, gaining an opening to camouflage, retract itself from the room, confuse the opponent using objects on the room, or even marking them with an annoying signal.

- The Beefshop! Lamp

Dif S Hugo Balaia #18 - The current version of the anomaly's victim, he has superhuman strength due to it, and becomes extremely violent in case he feels either his life or the Lamp's integrity are threatened.

Dif DC Anomalous Light - Belonging to the Lamp, this Gear is the main one responsible for the creation of the Doppelgangers.

- The Jack of Eyes

Dif St Lethal Equipment - Standard equipment for any fighter jet, with your machine guns, non-teleguided missiles, bombs with excited magnetic fields and harpoons that spin like drills. Basic stuff.

Dif A Evasive Maneuvers - The creature appears to boast a significant amount of knowledge regarding aerial combat techniques, being able to show movements such as the 90-270 degree Incline, the famous Barrel e Aurelion Rolls and even the Immermann Turn.

Dif DX Stunners - Besides the lethal equipment, some stunning stunners are part of its arsenal, having your EMPs, Sonic Wave Pulses, Light Flashes and curious Implosion Mechanisms.

Dif Sv Reinforced Shell of Biotitanium -The composition of its shell appears to be of a strange material which can only be interpreted as a type of "Biotitanium", which beyond possessing never seen before properties related to its resistance capabilities, can count with impact absorption tech, so that it can be converted into Gear energy.

Dif I Intimidation - What the creature possess in skills, it appears to lack in morals, being able to use crude demoralizing tactics such as insulting the target or even growling at it, or, when using its logic modules, formulate pessimistic estimates about the target's chances of survival, or create some kind of threat based on said data.

Dif E Jack of Eyes - The weird card with the Nonexistent Suit, only serves as a marker for the plane's target, sending the signal through unknown manners while it's in possession of said target.

- Green Constellation Cult Member

Dif St Brutal Strikes - The types of Moves that someone common could try to destabilize a person, like punches and kicks, a flying kick, a low swipe and trying to use any available weapons on the Inventory.

Dif A Hasty Moviments - With little technique to use in the self defense context, the cultists can try to evade or run to gain distance of possible aggressors.

Dif DX Ritualistic Organization - The context they live in allowed them to develop a certain affinity to the use of artifacts related to the Green Constellation, or or sigils belonging to the entity without name, and even use chants to channel their devotion to it.

Dif Sv Radioactive Body - Although they have an anomaly as their main energy source, their bodies are no different from a normal human being's, therefore all they can to to defend from attacks is resist.

Dif K Green Constellation's Enlightenment - The occult knowledge bestowed by the deity illuminates the blessed minds in a more highlighted way about their existence, making them aware about truths in the Natural, Religious, Ontological contexts, and even allowing for studies on an alleged Scientific context.

Dif I Cult Mentality - As every member of a fanatic cult, this excessive amount of faith that they project causes varied types of haziness in their psyches, which in turn cause disturbing negative effects in their lives. Some of these effects are seen in their tunnel vision regarding the world, with their interactions being resumed to fanatic discourse, absolute blind loyalty to the deity, general obedience to any compatible superiors and an extreme level of worshipping.

Dif Dr Radiopsychological Connection - It's not exactly telepathy, but the blessed members can get to, beyond emitting an unknown frequency which allows them to synchronize their senses of danger, with the lower ones having access to the Mental Alert and Calming Frequencies.

Dif GS Anomalous Radioactivity - This emitted radioactivity from the cultist's bodies apparently do not affect them negatively, but it is confirmed to be noxious to any strangers. The Cult Members can use them in rustic ways to attack targets, be it through a radioactive pulse which damages and slightly pushes the target, and orbs made of concentrated points of that energy, from which they are able to manipulate and launch into the targets in an unknown manner, presumably telekinesis.

- Green Constellation Blessed One

Dif St Brutal Strikes - The types of Moves that someone common could try to destabilize a person, like punches and kicks, a flying kick, a low swipe and trying to use any available weapons on the Inventory.

Dif St Energized Solids - Along with the benefits of narrowing their connection with the entity, the blessed perfected their defense techniques by developing a way to cover their bodies with isotope solids to help damage enemies, being able to smash them to cause physical damage, throw them for physical and radioactive damage, surround their fists with them to cause explosive punches and, lastly, create pointy crystals to pierce their enemies.

Dif St Channel Radioactivity - As if making some kind of contact with the entity, the blessed can manipulate the radioactive energy in a relatively more refined way, allowing them to channel them and to realize more complex moves such as beams, energy rams projected from their bodies, bear hugs which concentrate a considerable amount on their targets and an explosion which releases a lot of energy and causes noticeable damage.

Dif Sv Radioactive Body+ - With an advantage when relating to radio resistance, the blessed can use their bodies to resist attacks, parry them against enemies, nullify the energies of any attacks that involve non-physical elements and regenerate their bodies through cellular stimulation.

Dif K Green Constellation's Enlightenment - The occult knowledge bestowed by the deity illuminates the blessed minds in a more highlighted way about their existence, making them aware about truths in the Natural, Religious, Ontological contexts, and even allowing for studies on an alleged Scientific context.

Dif I Cult Mentality - As every member of a fanatic cult, this excessive amount of faith that they project causes varied types of haziness in their psyches, which in turn cause disturbing negative effects in their lives. Some of these effects are seen in their tunnel vision regarding the world, with their interactions being resumed to fanatic discourse, absolute blind loyalty to the deity, general obedience to any compatible superiors and an extreme level of worshipping.

Dif GS Radiopsychological Connection - It's not exactly telepathy, but the blessed members can get to, beyond emitting an unknown frequency which allows them to synchronize their senses of danger, with the lower ones having access to the Mental Alert and Calming Frequencies, also manipulating it to destabilize possible threats through molecular degeneration (5% Dif CS Damage; 10 Turns) and causing radioactive interferences to any possible tracking systems.

Dif GS Anomalous Radioactivity+ - This emitted radioactivity from the cultist's bodies apparently do not affect them negatively, but it is confirmed to be noxious to any strangers. The blessed take advantage of it in all kinds of creative ways to attack the targets, through the radioactive pulse and energy orbs, such as the cult members, but sometimes blending in the solids techniques to transform into a kind of "topochrysalis" (isotope statue), where no damage can be taken for up to 2 turns, or using super refined techniques to create two extra energy arms which aid in combat with radioactive damage.

- Green Constellation Cult Leader

Dif K Radioactive Manipulation - Makes use of the gift bestowed by the deity to provide to its family and defend them from any threats to their order. It's moves like punches and kicks are naturally blessed with radioactivity, the Partiluxovigon serves as the main minds deterrent, it has a touch that can Isoreveal items and entities, and it can use its staff to attack the targets.

Dif K Abnormal Strategies - Many aspects of its body and mind are completely taken by the nameless deity, and this connection allows the leader to move in unnatural manners, being able to evade attacks, float, redirect strikes using radioactivity and even absorbing energy-based strikes.

Dif K Atomic Deterrents - The techniques assimilated in its coexistence under the orientation of the Green Constellation allows the leader to act as it's hands, creating artifacts to either use or bestow others, and use the techniques normally taught to them to have the biggest level of security when battling. Furthermore, the heretics can be used as items to attack the targets.

Dif K Paranormal Body - Constant communion with the deity allows its soul to enter a state of harmony with the deity's soul, giving its body the ability to resist attacks, parry them, become intangible in case dodging doesn't work and convert the energy into shields.

Dif I Astrodivine Vision's Preaching - A submersão completa na sabedoria oculta fornecida pela divindade permitiu ao líder agir como a voz da Constelação Verde, permitindo a ele iluminar as mentes dos membros no contexto Natural (+10% Bônus em Habilidade Conhecimento Natural e +25% Bônus na Propriedade Sobrevivência), Religioso (+10% Bônus em Habilidade Conhecimento Religioso e +25% Bônus nas Propriedades Influência e Conhecimento) e Ontológico(+10% Bônus em Habilidade Conhecimento Ontológico e +25% Bônus na Propriedade Customizada). Também pode usar a Oratória Quântica para desmoralizar inimigos e hereges enquanto exalta os membros e abençoados do culto.

Dif I Messiah Syndrome - One of the most common and noticeable collateral effects on any person with a cult leader status' psyche is a heightened sense of protagonism and a self perception as a savior, which can be noticed by their fanatic discourses, a way of communication and lifestyle based on maxims and absolutes, a special charisma that's made to manipulate the cult members and a level of worship to the deity that echoes and reflects itself through all of the elements that involve the subject.

Dif Dr Radiopsychological Projection -The Cult Leader's Heart is not found inside of its body, as it is the main channel of linking the nameless deity to the material world. Because of that, the organ is found inside of the Idol of Stars, it being the main worship symbol of all, and allowing the leader to create Mental Alerts, Calming Frequencies, summoning members into the arena through the Idol of Stars' Calling and finally distort the fabric of spacetime for a while (equivalent to 3 Turns) to protect itself in an Extradimensional Safehouse.

Dif GS Radioactive Blessing - A significantly more refined area than all of the other members due to the radioactive ascension is energy manipulation, with an even stronger radioactive pulse (Damage x5), A Rain of Energy Orbs similar to minstars (Dif xd20 Damage), the capacity to regenerate all Gear at the same time (20% CS Multigear) and a Divine Astrobeam which falls from the skies to purify a whole area (Damage x20).

- Green Constellation Heretic

Dif St Brutal Strikes - Unfortunately, the creature doesn't have much of the same skills as a common being, even as strong as it is, only being able to swing wildly or throw itself on the target to cause some physical damage.

Dif A Wobbling Movements - With little technique to use in the self defense context, the cultists can try to evade or run to gain distance of possible aggressors.

Dif SV Radioactive Suffering - Completely affected by the anomaly, the constant suffering of their bodies, along with their more vulnerable state only allows them to kinda resist against attacks with everything they have, or possibly struggle to keep them away.

Dif GS Anomalous Radioactivity - The emitted radioactivity from the cultists' bodies apparently doesn't affect them in a physical level, but it does seem to cause constant psychological stress. The heretics use the radioactive pulse erratically and only look to distance themselves from possible threats, also regenerated if hurt.

- The Demon Eye

Has none.

- Wilhelm A. Soënder

Dif DX Armas Primárias - Soënder's arsenal is vast, being packed with Primary Weapons like a Light Machine Gun (Dif x d10 Individual Multigear), a Submachine Gun (Dif x d6 Individual), a Shotgun (Damage x3 Area Multigear) and a Sniper (Damage x10 Individual).

Dif A Treinamento Corporal - A man of Soënder's rank can and needs to demonstrate their merits through their training. With the experience he has, he can evade attacks, build improvised barricades with environment objects, crawl to defend himself from attacks in strategic places or even directly parry them!

Dif DX Armas Secundárias - Soënder's arsenal is vast, being packed with Secondary Weapons like a Hand Cannon (Dif x d10 Individual), a Grenade Launcher (Damage x10 em Area Multigear), a Pocket Arbalest (Blocks 1d3 Abilities) and an Electric Drill (Dif x20 + Initiative Turn Loss).

Dif DX Armas Brancas - Soënder's arsenal is vast, being packed with Melee Weapons like a Tactical Knife (Individual Damage), a Tomahawk (Area Damage), a Wakizashi (Multigear Damage) and a pair of Brass Knuckles (Damage x1.5).

Dif Sv Bulletproof Suits - Made-to-measure equipment for protection against any type of calamity and attacks against the soldier, from the top of the Helmet to the soles of the Shoes.

Dif I Nationalism - Expresses his passion to the country he protects through discourses, or shows his disdain for the "Symmetry454" system, which helps to establish his patriotism.

Dif He Anomalous Skull - The main way to make contact with Wilhelm's Memory. It is activated when an individual establishes physical contact with the object for a period longer than 10 seconds, in which they start showing symptoms such as nausea, dizziness, weakness, sleepiness and audiovisual hallucinations, gradually increasing in intensity the more time passes. At the end of the 10 seconds, the individual, in an unknown manner, is teleported to what can be described as a recreation of the events of the last battle of the war, in a limited space, confined to the Great Square, completely destroyed at the time and littered with battle casualties from every party.

Dif He V.E.T.A.L.A Protocol - The secret project Soënder envisioned, but ultimately discarded in real life. Consists of super attachments for the arms, legs and torso of a soldier, allowing him to carry multiply heavy weapons in just one arm. This prototype remembrance consists of attachments for a Minigun (Dif xd100 Individual + Block 1d6 Abilities) on the upper part of the left arm, the lower having one Harpoon, and a Flamethrower (Dif xd100 Area + Block 1d6 Abilities) on the right arm's, with the lower part having another Harpoon (Damage x2). Also has a Jetpack to help with movement.

- Shadow Dance

Dif Dn Male Dancer - The apparently male silhouette disposes of dance movements to realize any actions, and when working together with the female one, both can cause double trouble! (Damage = x2) To attack, he uses Offensive Moves. To defend or evade, Defensive Moves. In case he loses his rhythm, he can recover his Pacing to match the music again and recover lost CS (Dif/3). His exclusive movements are the "Hot Moves", which grant him 5 Drive for each successful realization.

Dif Dn Female Dancer - The apparently male silhouette disposes of dance movements to realize any actions, and when working together with the male one, both can cause double trouble! (Damage = x2) To attack, she uses Offensive Moves. To defend or evade, Defensive Moves. In case she loses her rhythm, she can recover her Pacing to match the music again and recover lost CS (Dif/3). Her exclusive movements are the "Smooth Moves", which create 3 afterimages of her (and 3 of the male one if he is still on the field), with 1 CS each, and for each that is damaged, 1 of enemy Drive is converted into Antimatter.

- Fake Abraxan Ghoti

6 DC The ability to distort and scramble all kinds of communication means or media of any type in a radius of approximately 656ft, being able to gradually creep negative effects in organic beings, in which case are felt as the degradation of the ability to communicate, move and survive with similar patterns to symptoms such as amnesia and illnesses that affect cerebral functions, becoming irreversible and possibly fatal after the 3 hours past.

- Seinokaze Citizen

Dif St Martial Arts - Can use their experience in self defense to stop enemy attacks, be it barehanded, using environment objects or any possible weapons they can have at hand.

Dif A Martial Training - That self defense experience also serves to avoid possible damage by using melee defense techniques, evading attacks or parrying them.

Dif DX Tool Manipulation - In case the citizen has functions inside the village (like fisherman, artisan, accountant), can use up to 3 tools to help with any actions where they're needed.

Dif SV Defensive Skills - Beyond the skills of a human being, the citizen can also manipulate their own blood to improve their defense capabilities, be it by redirecting attacks, hardening the blood to form shields or even purifying toxic substances.

Dif K Empirical Knowledge - Passed from Generations (when not taken by resurrections), this knowledge involves the main characteristics of the city, from its History, to its Scientific advancements and its Literature.

Dif I Town's Charm - One of the main pieces which keep the village alive, the citizen of Seinokaze can make it more interesting through their charisma, be it for good or for evil.

Dif Dr Cellular Vision - Beyond Blood Manipulation, the Essence transfer from the nervous system to the blood cells allowed the residents of Seinokaze to better comprehend them. Some things they can do, in case they are outside the body, include Analyze the environment in a molecular level, Operate the External body like it's own and Disperse it to cover an entire area with its cells.

Dif W Blood Manipulation - One of the main benefits of using the "Wind of Life" in their bodies. In combat, the citizen can hit the enemy, manipulate their marrow and plasma to regenerate the body or accumulate blood into a ball, which can work as a ranged attack.

- Seinokaze Possession

Dif W Strength Skills - While outside its original body, the blood of a Seinokaze resident can adapt to the Strength related properties of its host, becoming harmonious with it and allowing full control over all of them.

Dif W Agility Skills - While outside its original body, the blood of a Seinokaze resident can adapt to the Agility related properties of its host, becoming harmonious with it and allowing full control over all of them.

Dif W Dexterity Skills - While outside its original body, the blood of a Seinokaze resident can adapt to the Dexterity related properties of its host, becoming harmonious with it and allowing full control over all of them.

Dif W Survival Skills - While outside its original body, the blood of a Seinokaze resident can adapt to the Survival related properties of its host, becoming harmonious with it and allowing full control over all of them.

Dif W Knowledge Skills - While outside its original body, the blood of a Seinokaze resident can adapt to the Knowledge related properties of its host, becoming harmonious with it and allowing full control over all of them.

Dif W Influence Skills - While outside its original body, the blood of a Seinokaze resident can adapt to the Influence related properties of its host, becoming harmonious with it and allowing full control over all of them.

Dif W Danger Skills - While outside its original body, the blood of a Seinokaze resident can adapt to the properties of its host related to their sense of Danger, becoming harmonious with it and allowing full control over all of them.

Dif W Wind of Life Skills - While outside its original body, the blood of a Seinokaze resident can adapt to the circumstances and support the host with every needed type of help through the adequate use of blood manipulation.

- Seinokaze Abomination

Dif St Savage Strikes - After suffering with their bodies' deformings, their resources and attack techniques became way more wild and unorganized, with most of their moves focusing on causing impact with flying kicks and heavy hits, bluntly trying to cut the enemies or using their own bodies as a ram.

Dif St Martial Arts Reminiscence - Unlike their memories, their cognition severely deteriorated over time, leaving little space for movements derived from their martial arts knowledge to be applied, like simple Combos, simple offensive moves and taking objects from the environment to attack.

Dif St Blood Strikes - To compensate, the suffering they feel is capable of boost their blood in an uncommon manner, allowing for their living blood based moves to be done in a strangely better way, be it by hitting, (Damage x1.5), making the blood balls (Damage x1.5) or trying to drown the enemy in excessive amounts of blood.

Dif Sv Defensive Skills - The abominations' defensive skills did remain quite similar over time, even after suffering with all of the distortion, still being able to redirect enemy attacks and using the blood shields.

Dif Sv Cellular Universalization - The most convenient part of this "curse", for the abominations, end up being one of their strengths, for the excessive accumulated blood, which is now cursed, along with their body distortions, allowed them to have a considerably higher elasticity of their bodies, and the constant thirst for blood helped them keep the cycle constant by allowing them to steal any kind of blood for sustaining themselves.

Dif Sv Body Resistance - Their distorted bodies possess a higher resistance due to such elasticity, being able to better resist (Res x1.5), absorb more damage (Bonus x1.5) and being able to intimidate aggressors more effectively due to the disturbing factor of their body horror.

Dif Dr Tormented Eyes - On the outside, they may have been forgotten for days, months, maybe years... But in their minds, an eternity of oblivion has passed. And with that, they learned to recognize fear, hunt prey as a predator animal or even alert any nearby abominations.

Dif W Blood Manipulation - Such as their minds and bodies, their blood over time also became gradually corrupted, making the way they manipulate it more focused on stop and deter any possible threats by poisoning their own blood, synthesizing a toxin, which they can curiously use to regenerate, and spray that blood as a cursed cloud.

- Living Blood

Dif W Blood Manipulation - In this form, the creatures are way more vulnerable, as they are not inside a body, therefore they have a way more limited use of their blood manipulation, but they can still hit enemies (Damage/2), run (or whatever's equivalent to that) to dodge attacks, envelop the enemies to try to suffocate them and absorb nutrients to heal SC.

- Parvez Midam (The Fly of the Grayed Flowers)

Dif St Normal Strikes - The moves that an average person could try in an offensive against the target, such as hitting with the hands or feet, using tools at their disposal (Inventory) to attack, trying to low swipe or using one's body as a ram.

Dif A Vine-based Movement - Uses the plants that wrap around its body to move and evade attacks, being able to modify its shapes if possible, use them as a grappling hook for off-ground movement, planting itself on the ground to move below it or even use them as a slingshot to cover huge distances.

Dif St Plant Strikes - The same plants that can be used as movement can also be used to attack, with a common bash, piercing the target on a specific point, grabbing the target with the vines (in similar ways to the parasite of room 409 or even create and launch seeds which explode on impact (area damage).

Dif Sv Savage Tactics - Uses the learned tactics from its experience in different types of living beings to protect its life. The ones related to plants include stun seeds and generation seeds to try to steal organic matter for itself or even create new candidates for new bodies. Cornering the target like a predator corners prey, and scattering to acquire a vantage point on the area where the battle occurs.

Dif K Previous Bodies' Memories - The acquired knowledge from previous versions of its life. Can store the memories of up to 4 different bodies, discarding the oldest one (*the fly one being the only exception) if more than 4 are absorbed.

Dif I Lure - The characteristics of Midam gave the creature the ability to communicate and rationalize as a psychopath, making use of luring tactics and convincing to acquire new victims.

Dif Sv Plant Body - Uses its plant based body to resist attacks, in case evading is ineffective, absorb them if they involve energy or similar stuff, Photosynthesize to regenerate CS or steal it through the Vitality Steal ability.

Dif PS Bloodlust - By connecting with the mind of Midam, the fly also absorbed his taste for Slasher movies, incorporating some of his techniques into its hunting methods, be it for movements or attacks, dropping all civility to just try and eviscerate the target at all costs or trying to take advantage and parasite the target temporarily. (Equivalent time to 3 Turns).

- QKDNG

Dif x10 M Unknown - The core of existence, the very composition of what is Ontology condensed in a Gear. Can access a random Gear from any character, entity or hostile from the campaign, for the equivalent time to the number of active abilities on said gear. (First roll = d(Character Number - 1); Second Roll = d(Number of Character's Gears)).

Dif x10 Z Unknown - The core of existence, the very composition of what is Ontology condensed in a Gear. Can access a random Gear from any character, entity or hostile from the campaign, for the equivalent time to the number of active abilities on said gear. (First roll = d(Character Number - 1); Second Roll = d(Number of Character's Gears)).

Dif x10 Í Unknown - The core of existence, the very composition of what is Ontology condensed in a Gear. Can access a random Gear from any character, entity or hostile from the campaign, for the equivalent time to the number of active abilities on said gear. (First roll = d(Character Number - 1); Second Roll = d(Number of Character's Gears)).

Dif x10 Æ Unknown - The core of existence, the very composition of what is Ontology condensed in a Gear. Can access a random Gear from any character, entity or hostile from the campaign, for the equivalent time to the number of active abilities on said gear. (First roll = d(Character Number - 1); Second Roll = d(Number of Character's Gears)).

Dif x10 Qq Unknown - The core of existence, the very composition of what is Ontology condensed in a Gear. Can access a random Gear from any character, entity or hostile from the campaign, for the equivalent time to the number of active abilities on said gear. (First roll = d(Character Number - 1); Second Roll = d(Number of Character's Gears)).

Dif x10 Js Unknown - The core of existence, the very composition of what is Ontology condensed in a Gear. Can access a random Gear from any character, entity or hostile from the campaign, for the equivalent time to the number of active abilities on said gear. (First roll = d(Character Number - 1); Second Roll = d(Number of Character's Gears)).

Dif x10 Dg Unknown - The core of existence, the very composition of what is Ontology condensed in a Gear. Can access a random Gear from any character, entity or hostile from the campaign, for the equivalent time to the number of active abilities on said gear. (First roll = d(Character Number - 1); Second Roll = d(Number of Character's Gears)).

Dif x10 Lv Unknown - The core of existence, the very composition of what is Ontology condensed in a Gear. Can access a random Gear from any character, entity or hostile from the campaign, for the equivalent time to the number of active abilities on said gear. (First roll = d(Character Number - 1); Second Roll = d(Number of Character's Gears)).
